Notice

This publication is made up of a combination of extended abstracts and full papers, submitted by the authors without peer review. The papers in this volume should not be cited as primary literature. The Physiology Section of the American Fisheries Society offers this compilation of papers in the interests of information exchange only, and makes no claim as to the validity of the conclusions or recommendations presented in the papers.

For copies of these Symposium Proceedings, or the other 30 Proceedings in the Congress series, contact:

PREFACE

Symposium Organizers:

Gamperl, A. Kurt
Dept. of Organismal Biology, Portland State University

Anthony P. Farrell
Dept of Biol.Sciences, Simon Fraser University

Don MacKinlay
Fisheries Canada

CONGRESS ACKNOWLEDGEMENTS

This Symposium is part of the International Congress on the Biology of Fishes, whose main sponsors were Fisheries and Oceans Canada (DFO), the University of Aberdeen, Scotland and the US Department of Agriculture. The main organizers of the Congress, on behalf of the Physiology Section of the American Fisheries Society, were Don MacKinlay of DFO (overall chair, program and proceedings), Jan Flint (registration and accommodations) and Dominic Houlihan, University of Aberdeen (local arrangements). Preparation of the Proceedings was accomplished with the editorial and word-processing assistance from Cammi MacKinlay and Karin Howard.

I would like to extend a sincere 'thank you' to the many contributors who took the time to prepare a written submission for these proceedings. Your efforts are very much appreciated.

Don MacKinlay
Congress Chair

TABLE OF CONTENTS

The cardioprotective intent of cardiac natriuretic peptides <i>Olson, Kenneth R. and AP Farrell</i>	1
Hypoxia defense strategies of the American eel (<i>Anguilla rostrata</i>) heart <i>Driedzic, W.</i>	5
All trout are not created equal: hypoxia-tolerance of the in situ rainbow trout (<i>Oncorhynchus mykiss</i>) heart <i>Faust, Heather A. et al</i>	9
Glycolysis and creatine kinase at high performance in heart muscle of rainbow trout <i>Gesser, Hans and H. Winstrup-Schmidt</i>	15
Nitric oxide influences the Frank-Starling response in the isolated heart of the eel <i>Tota, Bruno, et al.</i>	19
Cardiovascular function in <i>Salmo salar</i> with infectious salmon anaemia (ISA): putative role of nitric oxide <i>Gattuso, A. et al.</i>	23
Effects of acute and chronic hypercapnia on heart function in eels <i>Agnisola, Cladio, et al</i>	27
Regulation of cardiorespiratory reflexes in the tropical fish Tambaqui: oxygen chemosensitivity <i>Rantin, F.Tadeu., et al.</i>	31
Reflex and central control of cardiorespiratory interactions in elasmobranch fish: A review <i>Taylor, E.W.</i>	35
Comparative aspects of cardiac contractility in teleost fish: clues about E-C coupling from isometric studies. <i>Farrell, AP, and HA Shiels</i>	45
Temperature dependence of cloned trout cardiac Na ⁺ -Ca ²⁺ exchanger <i>Xue, X-H., C. Elias, L. Hryshko and G. Tibbits</i>	53
Temperature dependent expression of sarcolemmal potassium currents in atrial and ventricular myocytes of the rainbow trout heart <i>Vornanen, Matti, and A. Nurmi</i>	61
Temperature dependence of L-type Ca ⁺ current in atrial myocytes from rainbow trout <i>Shiels, Holly A., M. Vornanen and A.P. Farrell</i>	65
Temperature dependence of cardiac contractility in a stenothermic fish species, the burbot <i>Tiitu, Virpi and M. Vornanen</i>	71

Non-invasive ultrasonography assessment of coronary flow reserve in <i>Halobatrachus didactylus</i> . <i>Joaquim, Natercia, J. Coucelo and J. Coucelo</i>	75
Changes in blood distribution in developing lower vertebrates Schwerte, T. R. <i>Fritsche and B. Pelster</i>	79
Hypoxic vasoconstriction in systemic arteries of the sea lamprey <i>Russell, M.J. and KR Olson</i>	83
An overview of the intrinsic control mechanisms in the coronary tree of trout isolated heart <i>Mustafa, Tariq and C. Agnisola</i>	87
Enhanced calculation of ventricular volumes in <i>Halobatrachus didactylus</i> ; a non-invasive approach <i>Joaquim, Natercia, J. Coucelo, and J. Coucelo</i>	91
Ca ²⁺ binding to cardiac troponin c: Effects of temperature and pH on cloned mammalian and salmonid isoforms. <i>Gillis, TE, et al.</i>	95
Effects of nitric oxide on the branchial circulation of the eel <i>Pellegrino, Daniella, et al.</i>	103
Electrophysical properties of the rainbow trout cardiac myocytes maintained in serum-free primary culture <i>Nurmi, Antti and M. Vornanen</i>	107
Cardiovascular and respiratory reflexes in the tropical fish, traira: CO ₂ /pH chemoresponses <i>Kalinin, Ana L. et al.</i>	113
Effects Of Ventricular Hypertrophy On The Coronary Microvasculature In Male Rainbow Trout Clark, J. Jason and Kenneth J. Rodnick.....	117
