#### Notice

**This publication is made up of a combination of extended abstracts and full papers, submitted by the authors without peer review. The papers in this volume should not be cited as primary literature. The Physiology Section of the American Fisheries Society offers this compilation of papers in the interests of information exchange only, and makes no claim as to the validity of the conclusions or recommendations presented in the papers.**

For copies of these Symposium Proceedings, or the other 30 Proceedings in the Congress series, contact:

## **PREFACE**

Symposium Organizers:

Joe Cech, Jr.  
Univ. California, Davis, CA, USA

Steve McCormick  
Conte Anadromous Fish Lab, Turner Falls, MA USA

Alex Haro  
Conte Anadromous Fish Lab, Turner Falls, MA USA

Don MacKinlay  
Fisheries Canada

## **CONGRESS ACKNOWLEDGEMENTS**

This Symposium is part of the International Congress on the Biology of Fishes, whose main sponsors were Fisheries and Oceans Canada (DFO), the University of Aberdeen, Scotland and the US Department of Agriculture. The main organizers of the Congress, on behalf of the Physiology Section of the American Fisheries Society, were Don MacKinlay of DFO (overall chair, program and proceedings), Jan Flint (registration and accommodations) and Dominic Houlihan, University of Aberdeen (local arrangements). Preparation of the Proceedings was accomplished with the editorial and word-processing assistance from Cammi MacKinlay and Karin Howard.

I would like to extend a sincere 'thank you' to the many contributors who took the time to prepare a written submission for these proceedings. Your efforts are very much appreciated.

Don MacKinlay  
Congress Chair

## TABLE OF CONTENTS

Low light as an impediment to river herring migration <i>Moser, Mary, J. Conway and W.S. Patrick</i> .....	1
The effects of acceleration and experience on high velocity swim performance in juvenile rainbow trout <i>McFarlane, Wendy and D. McDonald</i> .....	5
Sockeye salmon and a wild Alaskan waterfall: possible lessons for dam retrofits <i>Lauritzen, Dean, F. Hertel and M. Gordon</i> .....	9
Anadromy in brook trout: relation to diet partitioning with coexisting Atlantic salmon <i>Mookerji, Nandita, A. Mazumder and Z. Weng.</i> ..	13
The potential for introducing anadromous sockeye salmon into Lake Toya, Japan <i>Ueda, Hiroshi</i> .....	17
Energy reserves and nutritional status of juvenile chinook salmon emigrating from the Snake river basin <i>Congleton, James</i> .....	21
Monitoring the migrations of wild Snake River spring/summer chinook salmon smolts in the Columbia River basin, USA <i>Achord, Stephen et al</i> .....	25
Use of a pit-tag 'electronic weir' to examine Atlantic salmon smolt migration and winter survival <i>McCormick, Steve, et al.</i> .....	35
Freshwater to saltwater: the role of CRH in migratory behaviour in juvenile salmonids <i>Clements, Shaun</i> .....	37
Swimming performance and muscle function respond to elevated T3 hormone in smolting coho salmon <i>Katzman, Shana M. and J.J. Cech, Jr.</i> .....	39
Use of the San Francisco estuary by juvenile chinook salmon <i>MacFarlane, R.B.</i> .....	41
Modeling the migratory behaviour of juvenile salmon: what processes govern downstream movement? <i>Zabel, Richard</i> .....	45
Optimal swim speeds and forwards assists: energy conserving behaviours of up-river migrating adult salmon <i>Hinch, Scott and P.S. Rand</i> .....	51
Simulating migration behaviour and metabolic power consumption of up-river migrating Sockeye salmon in the Fraser River, BC <i>Rand, Peter and S.G. Hinch</i> .....	57
Migration of lowland river fishes through fish passes - the three P's: PITs, passes and potamodromy. <i>Lucas, Martyn C. et al</i> .....	63

Comparative vulnerability of endangered fishes to a fish screen <i>Swanson, C., P.S. Young, and J.J. Cech, Jr.</i> .....	67
Experiments with juvenile chinook salmon passed through high volume, fish friendly pumps at Red Bluff Research Pumping Plant, Sacramento River, California <i>McNabb, C.D., C.R. Liston, and S.M. Borthwick</i> .....	69
Salmon parr as models to explore adult salmon response at fish pass <i>Guiny, Eliane M., A. Ervine and J. Armstrong</i> .....	73
Downstream passage and behavioral response of juvenile salmon and steelhead at hydroelectric dams in the Columbia River system <i>Dauble, Dennis et al.</i> .....	77
Osmoregulatory responses in striped bass larvae: survival, growth, yolk absorption and development of chloride cells in body skin <i>Hirai, Narisato, et al.</i> .....	83
Using habitat selection theory to predict the migratory behaviour of stream fish <i>Hughes, Nicholas</i> .....	97
Performance of fish lift recently built at the Touvedo Dam on the Lima River, Portugal <i>Santos, Jose M. et al.</i> .....	101
Sprinting performance of upstream migratory fishes <i>Castro-Santos, T. &amp; A. Haro</i> .....	107
Performance and behavior of chinook salmon near a fish screen <i>Cech, Joseph J. Jr., C. Swanson and P.S. Young</i> .....	117
The effects of a barrage on the migration of Atlantic salmon smolts and adults <i>Ives, Mark, A. Moore and I. Russell</i> .....	119
The influence of rock ramp fishways on the hydraulic characteristics of weirs <i>Keller, Robert J. and L.J. Haupt</i> .....	123
Development of a tagging protocol for outmigrant juvenile lamprey <i>Lerner, Darren T. et al.</i> .....	133
Pacific lamprey migration behavior in a complex environment: obstacles to passage at Columbia River dams <i>Ocker, P. et al.</i> .....	139
Hydraulic apparatus for fish passage experimentation <i>Odeh, Mufeed, et al.</i> .....	143
Temperature effects on the stress responses and recovery of young splittail exposed to a fish screen <i>Young, P.S., C. Swanson and J.J. Cech, Jr.</i> .....	147
Developing spawning and incubation channels for river run migratory mahseers in Nepal <i>Shrestha, Tej K</i> .....	149
