

CEAA Information Requirements for Shellfish Aquaculture Tenure Applications		
PROJECT LOCATION AND DESCRIPTION	Location and Site Detail	<input type="checkbox"/> Legible map and/or chart to show general location of site (including latitudes and longitudes)
	Project Description	<input type="checkbox"/> Labelled scale drawings of the proposed site (both plan and profile views), including as applicable: <input type="checkbox"/> Any plans for site modification ('improvements'), including additional supporting site drawings. <input type="checkbox"/> Maps and drawings of existing tenure and infrastructure (if this is an application for the expansion of a site). <input type="checkbox"/> Details of any associated facilities within the tenure boundary (wharves, access roads, staff facilities, portable washrooms etc.).
	Operations General:	<input type="checkbox"/> Method and schedule for installation & decommissioning of structures <input type="checkbox"/> Harvesting procedures, including machinery (if required) and frequency of use, transportation of product from the production site to the processing plant. <input type="checkbox"/> Details of mitigation measures to be employed during the installation, construction, operation, maintenance, harvesting and decommissioning phases of the facility. <input type="checkbox"/> Operational plan - techniques & methodology used for culture
	Intertidal Culture:	<input type="checkbox"/> Details (i.e. location, scale and frequency of activity) of any activities or construction that will take place within the intertidal area. (i.e. will vehicles be required for any activities or construction?, etc.)
PHYSICAL	Water - Local Conditions & Quality	<input type="checkbox"/> Depths of site corners (at lowest and highest tides). <input type="checkbox"/> Details of current and wind directions and approximate peak velocities. <input type="checkbox"/> Information on potentially impacting nutrient or contaminant inputs into the tenure area.
BIOLOGICAL	MFEAP	<input type="checkbox"/> Marine Foreshore Environmental Assessment Procedure reports, including: <input type="checkbox"/> Transect information <input type="checkbox"/> Habitat observations <input type="checkbox"/> Photographs & maps
ENVIRONMENTAL MANAGEMENT PLANS	Accidents & Malfunctions	<input type="checkbox"/> Protocols for the prevention of, and response to, any potential accidents and malfunctions. Particularly: <input type="checkbox"/> Inspections & maintenance of major equipment (ie. how often will site inspections occur and how long will it take to respond to an on-site emergency, etc.) <input type="checkbox"/> Containment, clean-up, & reporting of small spills <input type="checkbox"/> Details relating to storage of hazardous materials, sewage and waste disposal.
	Predator Control and Response	<input type="checkbox"/> Measures to be taken to deter potential predators and minimise predator attraction and interaction.
	Biofouling Removal	<input type="checkbox"/> Details of equipment cleaning schedule, location, and procedures (ie. where, when and how will the cleaning of equipment take place) <input type="checkbox"/> Details on disposal of fouling organisms and grey water.
SOCIO-ECONOMIC	Fisheries	<input type="checkbox"/> Details on any known uses of the area in the vicinity of the proposed site by commercial, recreational, or aboriginal fisheries (including timing & proximity).
	Aboriginal Use	<input type="checkbox"/> Details on any known uses of the area in the vicinity of the proposed site by Aboriginal peoples. <input type="checkbox"/> Locations of any known sites of cultural or heritage significance within or adjacent to the tenure boundary.
	Tourism / Recreation	<input type="checkbox"/> Locations of known existing or potential conflicts with areas used for tourism or recreation. <input type="checkbox"/> Details of site's proximity to any potential or existing Federal / Provincial marine protected areas / parks / ecological reserves.
	Activity in Area	<input type="checkbox"/> Details of any adjacent aquaculture sites, including separation distance. <input type="checkbox"/> Location of any existing / known potential developments (e.g. marinas, docks, log dumps, ocean dumping) in the area.
	Health	<input type="checkbox"/> Details (including dates) of the Canadian Shellfish Sanitation Program (CSSP) classification for the site and/or the nearest classified area.
